PROFESSIONAL SUMMARY

Results-driven Senior Fullstack Developer architecting high-performance, scalable web applications using React.js, Next.js, TypeScript, and modern JavaScript (ES6+). Hands-on experience integrating AI/LLM APIs (including OpenAI and Anthropic Claude) to build intelligent, AI-powered user interfaces — from prompt-engineered chat widgets to retrieval-augmented UI patterns. Proven expertise in server-side rendering, responsive design, RESTful & GraphQL API integration, and cross-browser compatibility. Strong collaborator within Agile/Scrum teams, with a track record of delivering pixel-perfect, accessible interfaces from Figma wireframes to production.

TECHNICAL SKILLS

Frontend Core: React.js, Node.js, JavaScript (ES6+), TypeScript, HTML5, CSS3

AI & LLM Integration: OpenAI API, Anthropic Claude API, LangChain.js, Vercel AI SDK, Prompt Engineering, RAG-Based UI Patterns, AI-Powered UI, Chatbot Integration

State Management: Redux, Redux Toolkit, Context API, Zustand, Observables

Styling: Tailwind CSS, Bootstrap, Material UI, SCSS/SASS, Styled Components, Responsive Design

Backend & APIs: RESTful APIs, GraphQL, AJAX, JSON, Node.js (basic), WebSockets

Databases: MySQL, PostgreSQL, SQLite, MongoDB

DevOps & Cloud: AWS, GCP, Docker, Jenkins (CI/CD), Webpack, Vite

Version Control: Git, GitHub, GitLab, Bitbucket, Gerrit

Testing & QA: Jest, React Testing Library, TDD/BDD, Unit Testing, PR/MR Reviews

Tools: JIRA, Storybook, Figma (UI hand-off), Agile/Scrum, i18n, SEO Optimization

WORK EXPERIENCE

Senior Software Engineer

May 2019 – Present

Bestpeers Infosystem Pvt. Ltd.

- Architected and maintained complex SPAs using React.js and Redux with Next.js SSR, delivering measurable SEO uplift and faster page loads.
- Integrated OpenAI GPT APIs and Anthropic Claude APIs to embed AI-driven features — including intelligent search, automated content generation, and conversational chat widgets — directly into production web applications.
- Built prompt-engineering pipelines and managed context-aware conversation flows for AI chatbot UIs served to thousands of users.
- Developed a single isomorphic responsive website served across desktop, tablet, and mobile using React.js, reducing code duplication by ~40%.
- Implemented UI components from Figma/wireframe designs in close collaboration with UX designers and clients, achieving pixel-perfect accuracy.
- Authored and maintained custom NPM packages and Storybook component libraries consumed across multiple product teams.
- Maintained CI/CD pipelines using Jenkins; containerized deployments via Docker and cloud deployments on AWS.
- Bundled TypeScript and JavaScript modules with Webpack; enforced coding standards through MR/PR reviews and contributed to team code quality improvements.
- Participated in biweekly Agile/Scrum sprints with onshore and offshore teams, consistently delivering features on schedule.

KEY PROJECTS

Taygo — Lead Management & Communication Platform

cloud.taygo.com

Tech Stack: React, TypeScript, Custom NPM UI Library, Styled Components, i18n

- Integrated APIs and converted Figma designs into fully functional web pages for a productivity platform automating lead management, call systems, and customer communication.
- Built and published custom NPM packages and maintained a Storybook component library used across teams.
- Led sprint planning, conducted PR reviews, and drove end-to-end feature delivery.

Unirsal — Social Media & Customer Management System

unirsal.com

Tech Stack: React, Next.js, MongoDB, Docker, WhatsApp Business API

- Led frontend development using Next.js, taking full ownership of feature delivery for a unified WhatsApp chat & campaign management platform.
- Integrated AI-powered chatbot functionality and real-time messaging features using WebSockets and third-party messaging APIs.
- Coordinated with backend teams in daily standups and contributed to regular team reporting.

Finominal — AI-Enhanced Investment Portfolio Tracker

finominal.com

Tech Stack: React.js, HTML5, SCSS, Bootstrap, Material UI, JavaScript

- Served as Frontend Developer, redesigning the UI and adding AI-assisted portfolio insights to enhance the investor experience.
- Created reusable React components and resolved data visualisation graph bugs within a shared component library.
- Managed direct client communication for requirement gathering; presented deliverables to the Product Owner and CTO.

ACHIEVEMENTS & STRENGTHS

- Spearheaded adoption of AI integrations within the team, becoming the go-to engineer for AI-powered feature development.
- Successfully published multiple reusable NPM packages adopted across different product lines within the organisation.
- Consistently received positive client feedback for translating complex business requirements into intuitive, high-quality UI.
- Strong cross-functional collaborator — experienced working with designers, product managers, backend engineers, and clients across time zones.
- Passionate about clean code, performance optimisation, accessibility (WCAG), and staying current with emerging frontend and AI tooling.

EDUCATION

Bachelor of Engineering — Computer Science

2015 – 2019

Sagar Institute of Science & Technology & Research (SISTEC-R), Bhopal, India
